RE: Letter of Recommendation

New Africa Control Engineering (Pty) Ltd's first introduction to Africrest Properties was in 2014. During this time we have found them to be very amicable and reasonable in all matters but our appreciation of them grew substantially when our property needs drastically altered and even though we were tied into a lease, their ability to aid and accommodate our new requirements went above and beyond our expectations.

We confidently recommend Africrest Properties to anyone as an ethical and professional property company. Their genuine interest in helping us was a welcome change in today's times.

Yours Faithfully,

Alan Taylor
